

KENNY RICHARDSON KODIPALLY

☎ +91-8179252503 | ✉ kennykrichardson@gmail.com | 🔗 LinkedIn | 🐙 GitHub

ABOUT ME

Third-year B.Tech Artificial Intelligence student with strong foundations in data structures, algorithms, Python programming, SQL, and machine learning/deep learning. Experienced in building and deploying end-to-end AI/ML systems including NLP pipelines, computer vision models, and cloud-integrated web applications. Strong problem-solving ability demonstrated through academic and personal projects.

EDUCATION

Vaagdevi College of Engineering

Bachelor's, Artificial Intelligence

September 2023 – Jun 2028

GPA: 8.0

SR Dhruva Junior College, Warangal

Higher Secondary Education

May 2021 – May 2023

GPA: 80.4%

PROJECTS

Orzyn — AI Powered Developer Intelligence | 🐙 Github

Mar 2026- Jun 2026

- Built to provide AI-powered Developer Intelligence platform for Repository health analysis, Engineering velocity tracking, Contributor risk assessment, and AI-generated engineering insights...
- Designed to analyze repository health, engineering velocity, contributor concentration, project risk, productivity trends, historical performance, and AI-generated insights through a modern analytics dashboard.
- **Technologies:** Python, TypeScript, FastAPI, GitHub OAuth and GitHub REST API, Cloudflare Workers AI API, Uvicorn and Pydantic.

Fluid Deck AI - Powerpoint Enhancer | 🐙 Github

May 2026 – Jun 2026

- Fluid Deck AI analyzes PowerPoint (.pptx) presentations locally, extracting slides, notes, and structured content into AI-ready data for summarization, semantic search, documentation, and intelligent workflows.
- Fluid Deck AI extracts the contents of a .pptx presentation, analyzes every slide, preserves slide structure, and prepares the data for AI processing, semantic search, summarization.
- **Technologies:** TypeScript, Powerpoint Open XML, FastXML Parser, NLP

Mnemosyne - Second Brain System | 🐙 Github

Oct 2025 – Dec 2025

- Mnemosyne is an AI-powered desktop second brain that indexes your files, understands their content, and lets you instantly search, chat with, and rediscover documents, images, and notes using semantic search and local AI.
- AI desktop search with semantic indexing, file chat, and lightning-fast knowledge retrieval.
- **Technologies:** Express.js, TypeScript, SQLite, Transformers.js(@xenova/transformers), ONNX Runtime Web, TurboRepo

Achievements in GitHub | 🐙 Github

- Solved 100 LeetCode problems and maintained a public GitHub repository of competitive programming solutions, demonstrating strong problem-solving skills and the ability to deliver optimized solutions under time constraints.

SKILLS

Programming Languages: Python, Java, Scala, SQL

AI & ML: Machine Learning, Deep Learning, NLP, Transformers, CNNs, Transfer Learning

Generative AI: LLMs, Prompt Engineering, RAG, Agentic RAG, Conversational AI

Frameworks & Libraries: PyTorch, TensorFlow, scikit-learn, Hugging Face, LangChain, OpenCV, MediaPipe

Web & Databases: Flask, FastAPI, REST APIs, PostgreSQL, SQL

Tools & Technologies: Git, GitHub, Docker, Kubernetes, GCP, Hadoop, Spark, HDFS, MapReduce

Core Computer Science: Data Structures and Algorithms, Object-Oriented Programming, Operating Systems

CERTIFICATIONS & KEY COURSES

- Google Cloud Computing Foundations Certificate – Google Cloud
- Elements of AI — MinnaLearn & University of Helsinki
